

Plant: Bull Run Fossil Plant (BRF)
Date: December 6, 2024 (Placed in Operating Record)
Subject: Annual CCR Fugitive Dust Control Report
Reference: Title 40
Part 257: *Criteria for Classification of Solid Waste Disposal Facilities and Practices*
Subpart D: *Standards for the Disposal of Coal Combustion Residuals in Landfills and Surface Impoundments*
Operating Criteria: §257.80, *Air Criteria*

1. Introduction

Bull Run Fossil Plant (BRF) ceased coal burning activities in December 2023 and no longer produces coal combustion residuals. It is located at 1265 Edgemoor Road in Clinton, Anderson County, Tennessee. All CCR materials generated by the power generating station are processed and placed into the Dry Fly Ash Stack Lateral Expansion which is a permitted landfill located within the northeastern portion of the BRF reservation. An annual CCR fugitive dust control report, describing actions taken to control CCR fugitive dust and reporting citizen complaints and corrective action taken if any, must be filed annually pursuant to 40 C.F.R. § 257.80(c).

2. Fugitive Dust Control Measures

The current Fugitive Dust Control Plan states that the primary dust control measure will consist of conditioning and wetting of CCR material and associated CCR management activities. Conditioning and wetting CCR material has historically been an effective measure. The plan also states that other dust control measures may be utilized in combination including the following measures.

- Berms constructed as wind breaks
- Intermediate soil cover
- Chemical dust suppressants
- Sweeping of haul roads
- Limiting material drop heights
- Mobilization and use of additional water trucks

In accordance with the BRF Fugitive Dust Control Plan, the following additional dust control measures are in place.

- Intermediate soil cover on exterior slopes.
- Sweeping of haul roads as needed.
- Mobilization and use of additional water trucks.

3. Record of Citizen Complaints

The Fugitive Dust Control Plan allows for citizen input by providing a toll-free number for citizens to contact and submit complaints and/or concerns relative to dust control. When complaints are submitted, TVA will assign the appropriate CCPM Management personnel to investigate the complaint/concern and implement any additional dust control measures needed.

No complaints and/or concerns have been submitted by the public during this reporting period.

4. Summary of Corrective Measures

Corrective actions have not been implemented since dust control measures appear adequate and no complaints/concerns have been submitted.
