Power Generation and Transmission

- TVA has five combustion turbine sites in Mississippi. The Ackerman, Caledonia, Magnolia and Southaven facilities have combined cycle combustion turbines. At the fifth site, Kemper, a simple cycle combustion turbine produces power. Ackerman was purchased in April of 2015 and has a generating capacity of 713 megawatts. Magnolia is a three-unit plant with a capacity of 918 megawatts. Caledonia and Southaven each have three units that can generate more than 750 megawatts of peaking power per site. Kemper has four units with a total generating capacity of 348 megawatts.

TVA COVERS 15,553 Square miles OF MISSISSIPPI
421 Square miles WATERSHED MANAGEMENT

81 substations & switchyards
2,161 MILES OF transmission LINE
• TVA operates two solar facilities in Mississippi: a 36-kilowatt site on the Oxford campus of the University of Mississippi and a 17-kilowatt site at Mississippi State University in Starkville.

Land and Water Stewardship

• TVA manages recreational, natural and cultural resources on more than 1,700 acres of public land in Mississippi and partners with communities, and local, state and regional stakeholders to improve water quality and biodiversity, shoreline conditions, recreation, wildlife and habitats on TVA land, reservoirs and tributaries.

River Management

• About 200 million gallons of water per day are diverted from the Tennessee River to the Tennessee-Tombigbee Waterway to help support navigation and recreation, as well as protect aquatic habitat in Mississippi.

• TVA operates Pickwick Dam and Reservoir as part of an integrated multi-purpose reservoir system to provide numerous stakeholders a variety of benefits that include navigation, flood risk reduction, low-cost hydropower, water supply, water quality and recreational opportunities.

• Two municipalities in Mississippi draw water from the Tennessee River system. Water also is drawn for irrigation.
