

# Electric Forklift Program

POWER UP WITH CASH INCENTIVES

Electric forklifts have lower operating costs, lower emissions, less maintenance and quieter operation. Tennessee Valley Authority (TVA) incentivizes the replacement of internal combustion forklifts with electric-powered forklifts. Incentives are available for a limited time for the replacement of internal combustion forklifts with electric-powered forklifts. You can receive \$2,000 per replaced forklift when you make the switch.

## What is the Electric Forklift Program?

TVA's EnergyRight<sup>®</sup> Solutions Electric Forklift Program will provide an incentive of \$2,000 per forklift to replace internal combustion Class 4 (cushion tire) and Class 5 (pneumatic tire) forklifts with electric powered Class 1 (counterbalance) or Class 2 (narrow aisle) forklifts.

## Are You Eligible?

All TVA local power company (LPC) customers, directly served industrial (DSI) customers and LPC-served end-use customers are eligible. The following qualifying criteria apply:

- You must replace your existing Class 4 or Class 5 forklift with the purchase or lease of a new Class 1 or Class 2 forklift.
- The internal combustion forklift must be discontinued from use at the participant site.

*Limited time offer, funds available on first-come, first-serve basis.*

## Operational Criteria

The five year operational requirement for an electric forklift at the site is:

- Two years if operating at a 3-Shift per day operation
- Three years if operating at a 2-Shift per day operation
- Five years if operating at 1-Shift per day operation

## Get Started Today!

- Electric Forklift Program Vendors are trained to help you complete and submit the incentive application.
- Find a vendor today by visiting [EnergyRight.com](http://EnergyRight.com).
- Planning to submit the application yourself? Visit [EnergyRight.com](http://EnergyRight.com) to download the application.
