1. These figures reflect the electricity that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources TVA has purchased or generated includes: Nuclear (33%), Coal (29%), Natural Gas and/or oil (16%), Hydroelectric (8%), and Other (14%). [Source: TVA CY2016]

The average home in the Tennessee Valley uses 1300 kWh per month. [Source: TVA]
