**System Owners**

*If the System Owner is different than the Applicant, they will be notified via email through the system and be required to approve and submit the PAR as part of the Lifecycle. When it comes to them, the Capacity is already reserved and the Applicant has approved the Participation Agreement Request (PAR). The System Owner is also required to agree to the PAR before the Participation Agreement is officially assigned.*

**System Owner approves Participation Agreement Request (PAR) or Capacity Modification Request (CMR)**

If the System Owner differs from the Applicant, then the System Owner must approve the participation of the system in the Green Power Providers program. Participation Agreement Requests and Capacity Modification Requests will route to the System Owner after they have been approved by the Applicant/Participant.

1. Go to: [https://gpp.tva.gov/servicecenter](https://gpp.tva.gov/servicecenter)

2. Log into system with Username and Password

   Username and Password will be generated and sent to the system owner by TVA staff during CRR review process.

   The user is brought to the **Action Required** list – all cases pending approval.

   ![Action Required List](image)

   The PAR or CMR has been approved by the applicant and is routed to the System Owner for review. The document opens as a read-only document. At the bottom of the document is a statement of acknowledgement.

   ![Acknowledgement Statement](image)

   2. Click **Agree and Submit this Request** to acknowledge the PAR to continue.
